

# Mounting Applications

Threaded Rod or bolts can be screwed into the lug for mounting plaque or memorial

Sonic Welded to the back of the plaque or memorial

Mounting is not visible from the front

Multiple sizes available

**LUGS**

A diagram showing a cylindrical metal lug with a threaded hole on one end. An arrow points to the side of the lug, indicating where it is welded to the back of a plaque.

Holes can be drilled into concrete or masonry and filled with epoxy for a concealed mounting application

Sonic Welded to the back of the plaque or memorial

Mounting is not visible from the front

Multiple sizes available

**STUDS**

A diagram showing a threaded metal stud with a flat head. An arrow points to the side of the stud, indicating where it is welded to the back of a plaque.

Ideal for Wood applications

Head of screw will be countersunk to be flush with the surface of the plaque and finished with the same color and finish

Requires Holes through the front of the plaque

Multiple sizes available

**WOOD SCREWS**

A diagram of a standard wood screw with a Phillips head. The screw is shown at an angle, pointing towards the bottom right.

For Masonry or Rock applications

Head of bolt will be countersunk to be flush with the surface of the plaque and finished with the same color and finish

Requires Holes through the front of the plaque

Multiple size bolts and sleeves available

**EXPANSION SLEEVE**

A diagram showing an expansion sleeve bolt. It consists of a threaded bolt with a hexagonal head and a separate sleeve that fits over the bolt's threads.

Head of bolt will be countersunk to be flush with the surface of the plaque and finished with the same color and finish

Ideal for Drywall or Cement Block applications

Requires Holes through the front of the plaque

Multiple sizes available

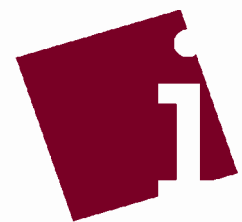

**TOGGLE BOLTS**

A diagram of a toggle bolt. It features a long, angled metal sleeve with a hole at one end and a bolt with a hexagonal head at the other. The bolt is inserted through the hole in the sleeve.
